Evaluate the home by considering site hazard, structure hazard and hazard reduction factors. Enter the appropriate rating for each factor, and calculate the category subtotal. Sum these categories and calculate the overall Wildfire Hazard Rating for the property; using this value, mark the associated risk/hazard level. Be sure to mark what actions were taken at the time of evaluation. NOTE: If completing form electronically, some values will be automatically calculated.

		What does the Wildfire Hazard Rating number mean?							
	Using the Wildfire Hazard Assessment, the highest possible rating is 150 points. Homes in the wildland/urban interface can be divided into the following four risk/hazard categories. The evaluator's judgment of this home's rating is indicated below:								
			LOW	Total Wildfire Hazard Rating 30 points or under					
			MODERATE	Total Wildfire Hazard Rating is 31 - 60 points					
			HIGH	Total Wildfire Hazard Rating is 61 - 90 points					
			VERY HIGH	Total Wildfire Hazard Rating is 91 - 120 points					
			EXTREME	Total Wildfire Hazard Rating is over 120 points
