

2026 WEST VIRGINIA

*Where holiday traditions and
environmental stewardship go
hand-in-hand*

Looking for the perfect Christmas tree? Wanting to support local farms during the holiday season? Hoping to keep your pockets green while keeping our forests green?

Visit a West Virginia Choose & Cut Christmas tree farm!

West Virginia tree farms grow a wide selection and variety of high-quality trees that bring the beauty and aroma of the forest to your home. While growing on these farms, Christmas trees stabilize the soil, protect water quality, and provide cover for wildlife. Growing Christmas trees absorb carbon dioxide while emitting fresh oxygen. They also beautify the landscape with their classic shape and lush foliage – something not found on artificial trees. Best of all, they can be easily recycled after the holiday.

Visit a West Virginia Choose & Cut Christmas tree farm this holiday season —where holiday traditions and environmental stewardship go hand-in-hand.

WEST VIRGINIA CHRISTMAS TREE GROWERS ASSOCIATION

Since 1954

Growing and marketing high quality products for your family and the consuming public. The operators of the Association's member farms are true stewards of the land and grow "Real" trees to help in the conservation and improvement of our natural resources. Contributions from the WV Christmas Tree Growers Association help make this publication possible.

MISSION:

- To develop, for the benefit of the Christmas tree growers of West Virginia, and those interested in this activity, an opportunity to exchange ideas and experiences, and to plan cooperative efforts which will aid in the production and marketing of Christmas trees.*
- To maintain a high level of ethical behavior among the Christmas tree growers and sellers by practicing the "Code of Ethics for "Christmas Tree Growers" as adopted at the annual meeting in 1956.*
- To affiliate and cooperate with the National Christmas Tree Association, and to cooperate with other organizations interested in the development of the Christmas tree industry.*

WV Division of Forestry

Our Mission

The West Virginia Division of Forestry is committed to protecting, nurturing, and promoting the wise utilization and thus the sustainability of our state's forest resources.

Our Programs

Fire Protection: Responsible for protecting nearly 12 million acres of state and privately-owned forestland across West Virginia from wildfire.

Investigative Unit: Investigates all violations of the state's fire laws and enforces violations of the Logging Sediment Control Act of 1992.

Water Quality: Issues licenses to anyone who buys timber or logs for resale or who harvests timber within the state and provides training and certification for loggers in accordance with the Logging Sediment Control Act.

Managed Timberland: Promotes sustainable forestry within the state by providing a formula-based method of taxation for forestland.

Forest Management: Provides cooperative forest management programs for private nonindustrial forest landowners to promote sustainable forestry practices. Also, regulates the digging of ginseng, manages seven state forests.

Urban and Community Forestry: Helps municipalities throughout the state establish long-term tree care programs.

Keeping Your Christmas Tree Fresh Through the Holiday Season

Nothing beats the smell of a fresh Christmas tree, but fresh trees need special attention. To keep your tree fresh and beautiful when you get home, as well as to lessen the risk that your tree will become a fire hazard, follow these simple tips:

- 1. Cut at least one inch off the main stem, place the tree in a clean pail of warm water and put it in a cool, shaded area where it is protected from the wind and the sun.*
- 2. When ready to bring the tree into your home, make another cut of at least one inch off the main stem and place the tree into a water-filled stand as quickly as possible. A bucket of sand and water may also be used in place of a stand. It is always important to maintain a suitable water level.*
- 3. Trim the tree in all its finery, sit back and enjoy your creation throughout the holiday season.*
- 4. Dispose of your tree properly as soon as the holiday season is over. Never attempt to burn a live Christmas tree in a fireplace or wood stove. This can be very dangerous.*

Fresh pines and firs will hold their needles for several weeks when treated in this fashion. Spruces will hold their needles for at least two weeks.

To be assured that you get the tree you want, please call the farm before making the trip.

Christmas Tree Safety

- *Buy locally grown Christmas trees if possible. Bounce and shake the tree. Pull the needles. If the needles fall, the tree is not fresh.*
- *Just before the Christmas tree is placed in the tree stand, make a slanting cut an inch or two up the trunk from where the tree was originally cut. Removing this lower inch or two will produce a fresh, clean surface that will allow the tree to absorb water easily.*
- *Keep the base of the tree under water at all times. A Christmas tree may use a quart of water a day, so keep a close watch on the water supply.*
- *Certain other precautions should be taken to ensure a safe Christmas. All lights should be inspected for faulty wiring and sockets. If any defect is found, the set should be discarded. Only light sets carrying the Underwriters Laboratory safety seal should be used. Other sets may be dangerous.*
- *Keep all flammable decorations, such as paper or cotton, away from the Christmas tree. Angel hair, snow spray, and white plastic foam are common decorations on Christmas trees. When used separately, angel hair and snow spray are essentially safe. But the National Fire Protection Association reports that when snow spray is used on angel hair, the combination is so flammable that just a touch of fire will cause it to burst into flame. While plastic foam may appear to be fireproof, it may burn if ignited by a spark.*
- *Artificial trees may be dangerous, too. Never string lights on a metal tree. A short circuit may easily electrify the tree and cause serious injury to anyone coming in contact with it. Colored spotlights should be used to illuminate this type of Christmas tree.*

BERKELEY COUNTY

Lynch Christmas Tree Farm

635 Airport Road, Martinsburg, WV 25405

304-839-6886

lynchchristmastreefarm.com
